DHEA 25 mg
Micronized Dehydroepiandrosterone

DESCRIPTION
DHEA capsules contain highest purity micronized dehydroepiandrosterone (DHEA) produced under strict Good Manufacturing Practices (GMP) standards.

FUNCTIONS
DHEA is a natural steroid hormone that is synthesized from cholesterol through pregnenolone by the adrenal glands. DHEA acts as an antagonist for glucocorticoid hormones and is the parent precursor for other important steroid hormones, such as estradiol and other estrogens, and testosterone. While not a precursor to progesterone, DHEA can indirectly influence progesterone synthesis through a feedback mechanism whereby pregnenolone is converted to progesterone based on DHEA levels. Apart from these functions, DHEA also has important biological functions itself. Recent experimental and human studies show that DHEA is involved in a large variety of physiological processes, including immune function, brain function, bone metabolism, blood lipid metabolism, energy metabolism, the regulation of normal blood sugar and insulin levels, and the maintenance of lean body mass. DHEA and its metabolite DHEA sulfate are present in human adult plasma in concentrations of 0.01-0.02 μM and 5 to 7 μM, respectively. DHEA sulfate levels are low in early childhood, begin to rise after age 7, peak at age 20-24, and then drop at a rate of approximately 20% per decade, until at age 85-90, levels are 10-15% of what they used to be at age 20-30. DHEA levels also decline under a variety of conditions of physiological stress, such as acute and chronic infections, and trauma. Vegetarians have been shown to have decreased DHEA levels as well.

INDICATIONS
DHEA capsules may be a useful nutritional adjunct for individuals who wish to support the body’s normal DHEA functions.

FORMULA [WWW #10045]
One Capsule Contains:
DHEA (micronized) .............................................. 25 mg
Other Ingredients: Vegetable cellulose (capsules), vegetarian leucine.
DHEA is micronized to increase absorption. It is made with pure, pharmaceutical grade DHEA.

SUGGESTED USE
As a dietary supplement, adults take one (1) capsule daily with meals, or as directed by a healthcare professional.

SIDE EFFECTS
Warning: Not for use by individuals under the age of 18. Do not use if pregnant or nursing. Do not exceed recommended serving. Discontinue use and call a physician or licensed qualified healthcare professional immediately if you experience rapid heartbeat, dizziness, blurred vision, or other similar symptoms.

STORAGE
Store in a cool, dry place, away from direct light. Keep out of reach of children.
